TECHNICAL DATA SHEET

FLOREY® SNF Naphthalene Water Reducer

SNF naphthalene water reducer

Sodium Naphthalene Sulfonate Formaldehyde Condensate

Supplier: Luoyang Florey Import and Export Co., Ltd.

Website: www.floreyconcrete.com

Product Description

SNF is a powdered naphthalene sulfonate formaldehyde condensate used as a water reducer for concrete. It is available in two grades, SNF-5 and SNF-18.

Applications

Use in concrete mixes to reduce mixing water for a target workability. Evaluate the selected grade with the cement and other materials used on the project.

Product Specification

Item	Specification
Solid content, both grades (%)	≥91
Sodium sulfate, SNF-5 (%)	≤5
Sodium sulfate, SNF-18 (%)	≤18

Guidelines for Use

The general SNF data sheet gives a typical dosage of 0.5–1.5% by mass of cementitious materials. Determine the optimum dosage through concrete trial mixes.

Storage and Handling

Store at 10–40°C, protected from direct sunlight, rain and contamination. Shelf life is at least 12 months under the stated storage conditions. Consult the supplier before using material beyond this period.

Packaging

Available in 25 kg woven plastic bags with polyethylene liners, with or without pallets.
